

DESCRIPTION

Play money is a valuable tool in education, offering a hands-on way for students to learn about money, budgeting, and basic math concepts. By using pretend bills and coins, learners can practice counting, making change, and understanding the value of different denominations in a practical setting. Play money also helps teach real-world skills like managing finances, recognizing currency, and developing a sense of financial responsibility. Whether in the classroom or at home, play money brings math lessons to life, turning abstract concepts into something students can touch and interact with.
